**Stockton East Water District  
Application 30603A**

**Attachment 1 to Environmental Information Form**

*1. Description of Proposed Changes or work remaining to be completed.*

The project is not physically changing, but the Applicant requests a change in the characterization of the "storage" and "direct diversion" terms and amounts to account for treating groundwater recharge as a storage right rather than a direct diversion right. Application 30603A seeks currently unappropriated water.

Presently, Application 30603A seeks 750 cfs by direct diversion and 60,000 afa to storage during December 1 through March 31. However, 200 cfs of the 750 cfs was for groundwater recharge purposes. This equates to 48,000 afa for the 121 day diversion period December 1 through March 31. Since it has been determined that the 200 cfs is considered underground storage, this amount should be added to the requested storage amount and deducted from the direct diversion amount sought.

With this change, Application 30603A is for the following:

- Diversion season: Dec. 1 through March 31
- Direct Diversion: 750 cfs (3,900 acre-feet maximum)
- Storage: 108,000 afa (underground storage)
- Total sought by direct diversion and storage: 111,900 AF

These changes are semantic only, and do not change the total amount of water to be taken from the stream system each year, or the rate at which it will be diverted.

The combined amount sought under Applications 30603A & 30603B will still not exceed 407,000 afa. The total combined storage under both Applications will not exceed 359,000 and the total combined direct diversion under both Applications will not exceed 159,900 acre-feet. The Applicant intends to pursue both Applications. If A30603A is permitted prior to A30603B, and A30603B is later permitted, A30603B will supersede A30603A to the extent of any duplication.

The Applicant is also seeking a change in place and purpose of use. The proposed place of use is shown on the Map to Accompany Applications 30603A & 30603B filed with the SWRCB on July 14, 2006. This map supersedes all previous maps submitted for these Applications. The place of use was changed to conform to the new boundary of Stockton East Water District resulting from annexations after Application 30603 was issued for public notice, and to accommodate additional areas within the City of Stockton's sphere of influence. The purposes of use will include water quality enhancement, fish and wildlife preservation and enhancement, saline repulsion and improving groundwater levels, in addition to the present purposes of municipal, irrigation and groundwater recharge.

The Applicant has identified new Points of Rediversion for Applications 30603A & 30603B. The points of rediversion and their location descriptions are shown on the Map to Accompany Applications 30603A & 30603B.
